**PUBLIC INFORMATION MEETINGS ON I-93 IMPROVEMENTS**  
**UPDATED TRAFFIC VOLUME PROJECTIONS TO BE PRESENTED**

The New Hampshire Department of Transportation (NHDOT) announces Public Information Meetings will be held on Tuesday, March 18 and Wednesday, March 19, 2008 to present and discuss traffic volume projection results from the updated traffic model developed for the I-93 project (Salem to Manchester).

The March 18 meeting will be held in Londonderry in the Town Council Meeting Room at the Town Administration Building. The meeting on March 19 will be held in Salem in the media room of Salem High School. Both meetings will start at 7:00 pm. and end at 9:00 pm.

Staff from the NHDOT and its consultant will be on hand to present and discuss the results. Updated information about projected traffic volumes on I-93 between the state line in Salem and the I-293 split in Manchester, and on nearby secondary roadways will be presented at the meetings. The updated traffic volume information corresponds to anticipated conditions in the years 2020 and 2030.

The traffic volumes are being updated as part of the I-93 project's Supplemental Environmental Impact Statement (SEIS). Additional information is available on the project's website at [www.rebuildingi93.com](http://www.rebuildingi93.com).
